

NFT VISION HACK

# RARIEMBED

Embed Rarible asset anywhere

[rariembed.glitch.me](https://rariembed.glitch.me)

@picsoung

# Potential

1

Give more visibility to  
NFT ecosystem

2

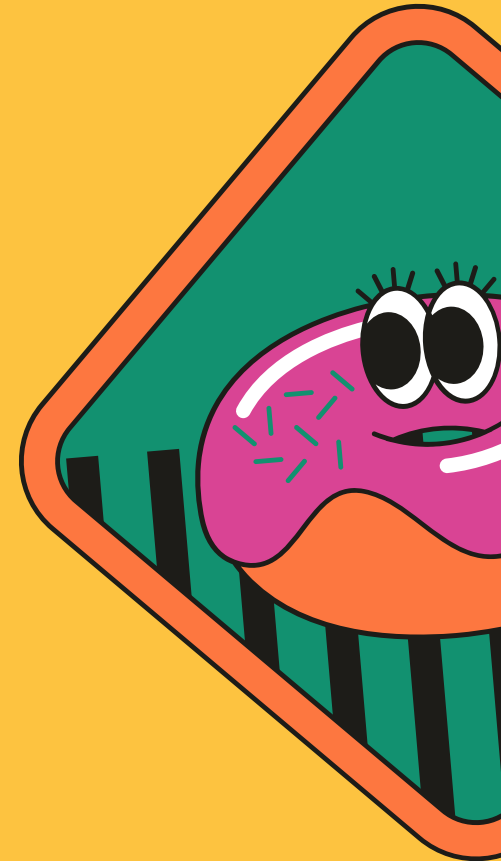

Show your collections on  
your website

3

Generate affiliate  
revenue

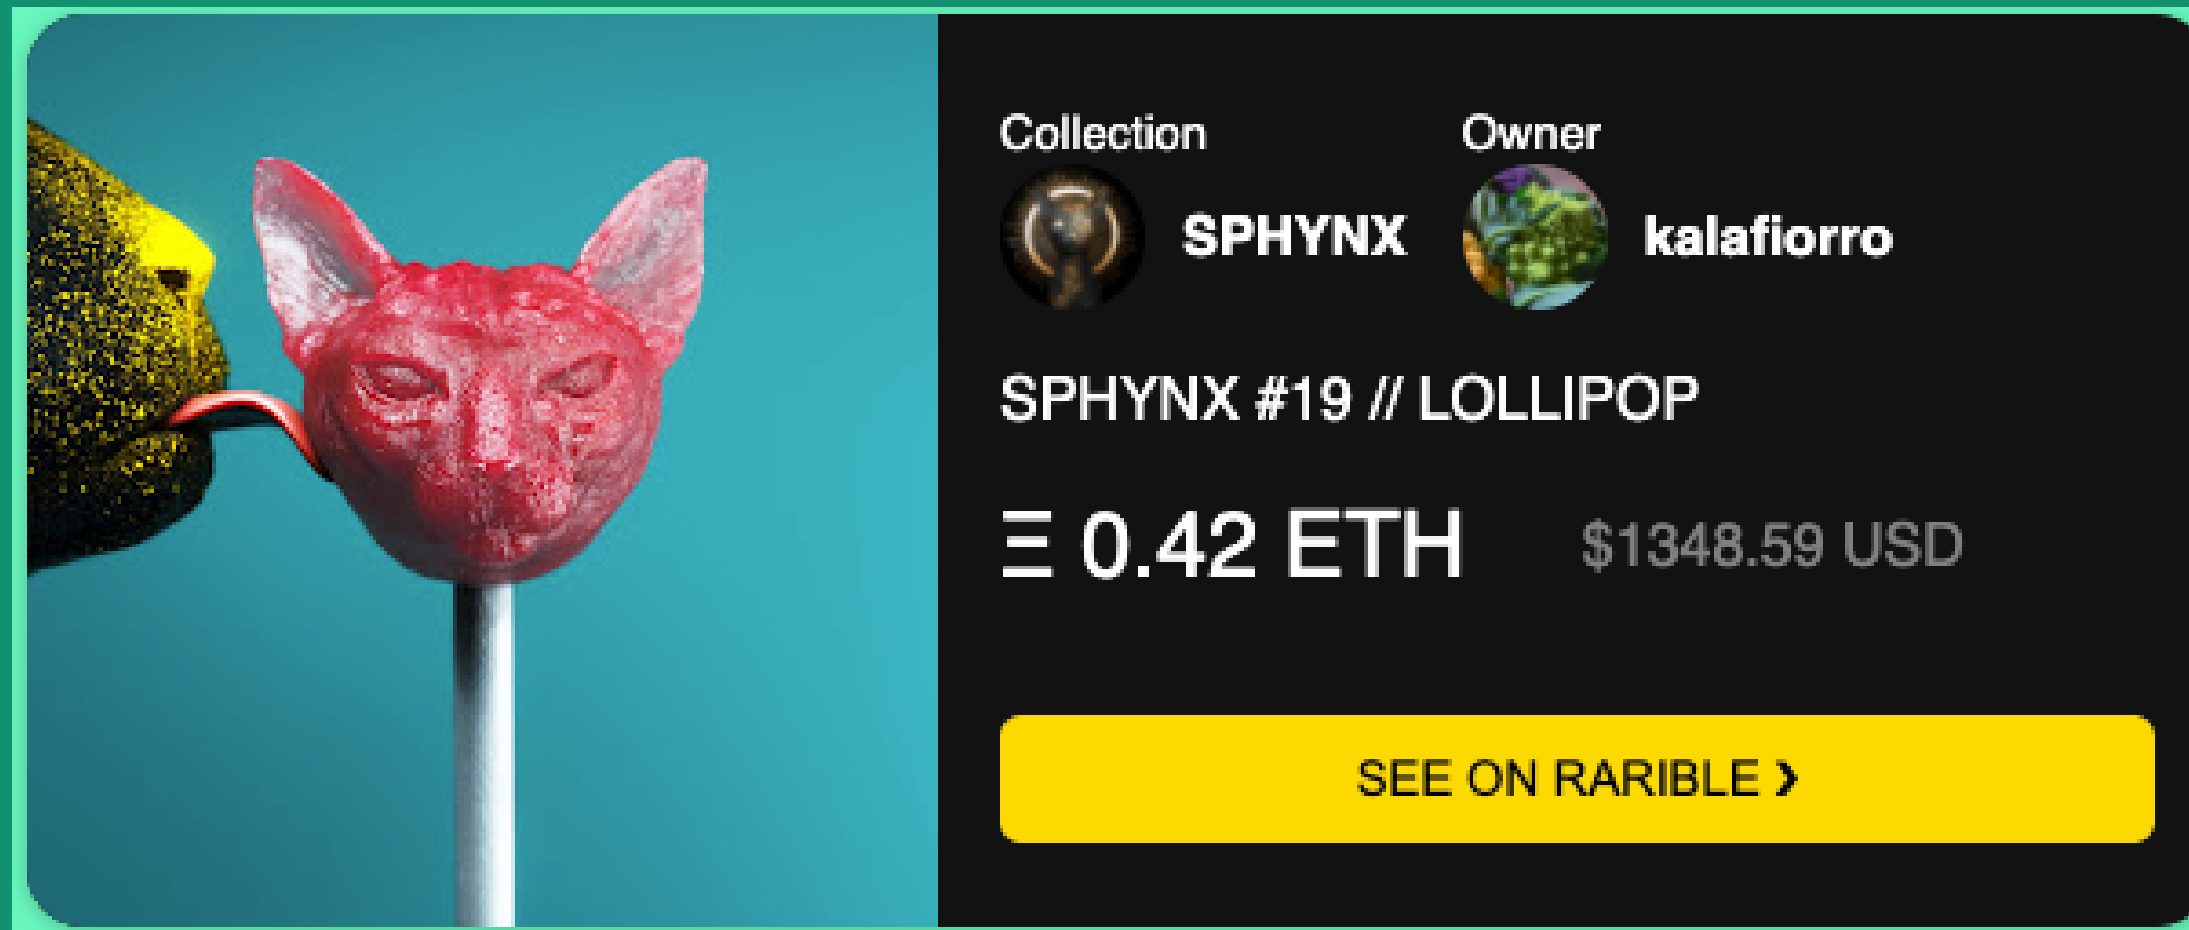

@picsoung

[rariembed.glitch.me](https://rariembed.glitch.me)

# Two lines of code ✨

```
<rari-embed tokenAddress='{TOKENADDR}' tokenId="{TOKENID}"></rari-embed>  
<script src="https://unpkg.com/rariembed/rariembed.bundled.js" type="module"></script>
```

# Stack

What powers the magic

**Lit Component**

**AWS Lambda**

**Rarible protocol**

**Glitch**

**JavaScript**

**CSS**

# Going further

✦ Things I wished I had to time to implement

Buy directly from embed

oEmbed

Show item attributes in a nice way

Test all buy/auction cases

# Scalibility

✦ What will make this project a success

Easy to get a snippet

AWS Lambda

NPM module

Open source
